Discover the One Thing You Should Have in Your Kitchen to Increase Your Profit Margin

Profit = Easy living. Have you ever heard of a restaurant being a second home?

Well, let's face it. You are the proud owner of a restaurant, but you spend more time there than in your own home. Shouldn't you have there, all the comforts of home?

The TRICON Commercial-Grade Walk-In Freezer is an innovative way of taking care of, and preserving your food. *Food spoilage* will be a nightmare of the past.

More Money in Your Pocket

The TRICON Freezer is a modular designed freezer conceived with your current and future restaurant needs in mind. This is not a one size fits all freezer. The particular needs of your restaurant are considered. You can expand at your own pace—as you grow and see fit. Not only can you add different components, but it is easy to install. This means saving money on parts that you presently don't need and saving you money on the installation costs. Overall your savings mean increased income.

Ways to Keep Money in Your Pocket

Who else doesn't want to see their electric bills reduced? This is what you'll get with the TRICON Walk-In Freezer.

Although the TRICON Freezer is more expensive than other comparable walk in freezers, it uses less electricity. In fact it can save you 10% to 20% off of your electric bill. That means you will not only offset the difference in price compared to competitive products, but you'll also increase your profit margin in the long run. Therefore you'll have more disposable income and provide better things to your family. They'll appreciate you more.

Spoiled Food is the Last Thing You Want to Hear

Imagine the nightmare it will be, if there'll be a power outage for a couple of days. Food thrown away. It would be like money from your wallet thrown away.

There is a very interesting feature about the TRICON Freezer, it has a battery backup system. In case of a power failure, your freezer will retain 85% of the original temperature for 3 days. That means you'll be able to significantly reduce food spoilage by keeping your food fresh. And you will not only be in compliance with health and safety regulations, but you won't waste any money. You're going to have peace of mind in spite of a blackout and will be able to provide your customers with their wants.

Our Warranty Beats the Competition by 2 Years

The TRICON Freezer comes with a 7 year warranty which is two more years than competitive products. In case of malfunction, you'll have 2 more years compared to competitive freezers. That means not only for you, greater savings, but peace of mind in the knowledge that the needs of your freezer will be taken care of.
